Regime 1 represents the high-risk state, Regime 2 represents the low-risk state. *** indicates marginal significance at the 1%-level, ** at the 5% -level, and * at the 10% -level. The sample period is 2010~2018. In addition, this paper has tried three regimes and four regimes, but the results show that some standard error of parameters are very large in the three regimes and four regimes. Thus, this paper finally selects the two regimes.

Appendix D. Sensitivity analysis.
